

This guide along side the "How to measure your kitchen" video ()

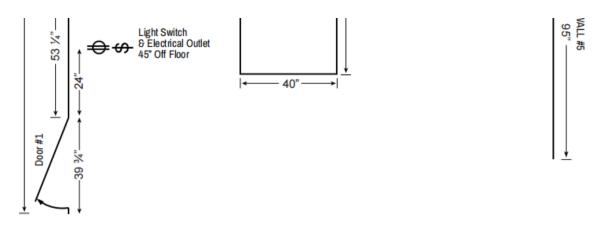

will give you step-by-step instructions on how to measure and create a floor plan (aerial view) of your space.

This information will provide our designers with everything they need.

Please use the example below for your reference while creating the floor plan of your space.

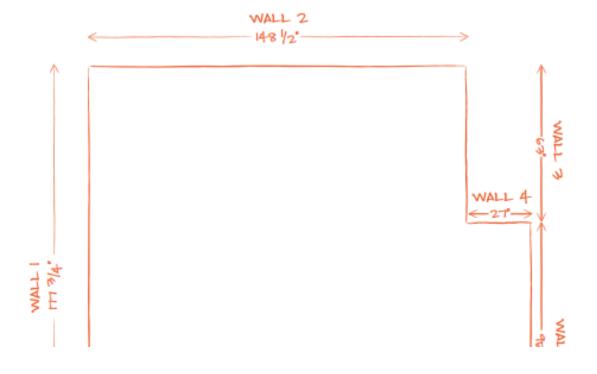

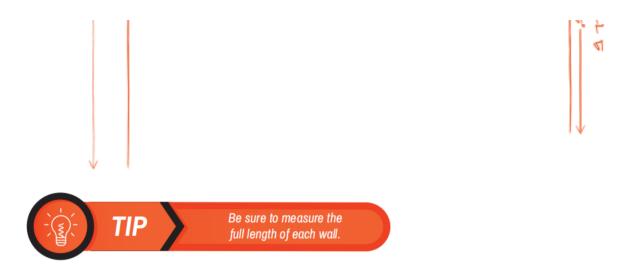

Utility/Mechanical Legend: Use these symbols on your floor plan.

Step 1: Measure Your Space

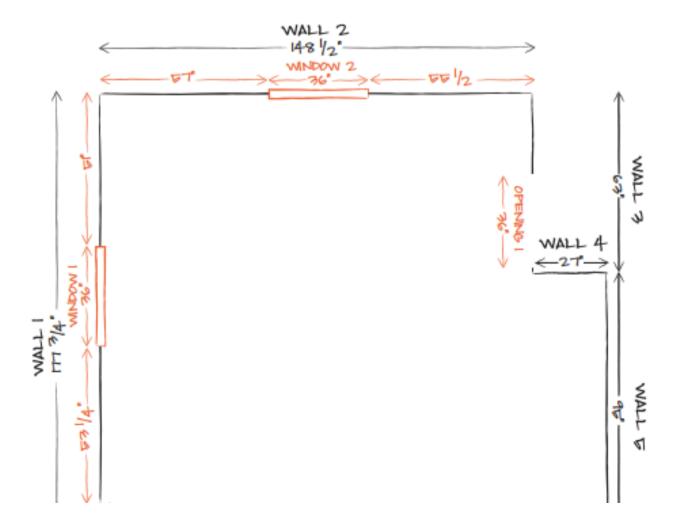

- Starting in the left corner, measure each wall in the space that will contain cabinets and record those measurements (in inches) on the "Floor Plan Design Grid" located on the last page of this Measuring Guide.
- Number each wall on the floor plan.

Step 2: Doors, Windows, Room Openings

- Locate and measure doors, windows and room openings.
- Record and Number each door, window and room opening on the grid.
- Record the corresponding dimensions in the measurement charts below.

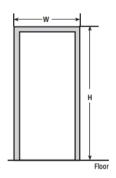

When measuring doors, windows and room openings include the trim/casing in the dimensions.

Door/Opening Measurements

*Label on Floorplan using the corresponding numbers below

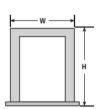

Opening or Door	Width	Height	Notes:
or Door			
1			
2			
3			
4			

Windows Measurements

*Label on Floorplan using the corresponding numbers below

	Width	Height	Notes:
Window			
1			
2			
3			
4			

Step 3: Obstacles

- Locate and measure obstacles such as electrical outlets, vents, pipes, radiators, ect.
- Record any islands you already have or wish to add.
- Record and Number each obstacle on the grid.

Step 4: Appliances

Common appliances typically come in standard sizes but it is important that we have the measurements. Luxury appliances such as cooktops, range hoods, warming drawers, and wine chillers have dimensions that can vary drastically

Range

Brand/Model	Width	Depth	Height
Microwave			
Brand/Model	Width	Depth	Height

Refrigerator

Brand/Model	Width	Depth	Height
Dishwasher			
Brand/Model	Width	Depth	Height
Cook-Top			
Brand/Model	Width	Depth	Height
Oven			
Brand/Model	Width	Depth	Height
Hood			
Brand/Model	Width	Depth	Height
Other			
Brand/Model	Width	Depth	Height

Step 5: Ceiling Height

Accurate ceiling height measurements are very important when determining which wall cabinets and crown moulding you want in your new kitchen. It is very important to take several measurements as the height can vary in different spots in the room. Many older homes have soffits above their wall cabinets that need to be taken into consideration when creating your design.

A = Ceiling Height

Ceiling Height: _____

Soffits (the area between the top of the wall cabinet and the ceiling).

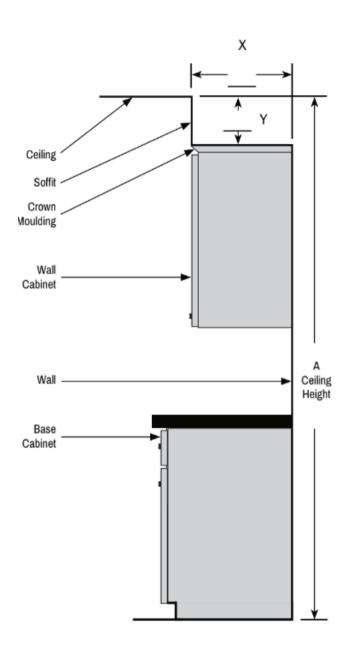

Does the room have soffits?

If yes, please mark the diagram to the right.

☐ Yes ☐ No

Do you plan to keep the existing soffits?

☐ Yes ☐ No

Please check any additional items

you are interested in adding:

- □ Base Molding
- □ Crown Molding
- □ Garbage Pull Out Cabinet
- □ Glass Doors
- □ Microwave Upper Cabinet
- □ Open Shelves
- □ Soft Close Doors
- □ Wide Storage Drawers

- $\hfill\Box$ Crown Molding on the Ceiling
- □ Cutlery Divider
- □ Decorative Door Panels
- □ Lazy Susan
- □ Light Rail Molding
- □ Microwave Base Cabinet
- □ Plate Rack
- □ Roll Out Trays
- ☐ Spice Pull Out Cabinet
- □ Wine Storage
- □ Wood Hood

Step 6: Photos & Submit

Now that you have completed the measuring guide, it is time to take some photos of your current space. Make sure to include

pictures of each wall that will contain cabinets.

Floor Plan Design Grid

Use the grid below to draw the floor plan (aerial view) of your space. Follow each step of the guide to complete the drawing.

- Step 1: Measure your space Step 2: Doors, Windows & Room Openings
- Step 3: Obstacles Step 4: Appliances
- Step 5: Ceiling Height Step 6: Photos and Submit

Note: Each small square is 3" x 3" and each large square is 12" x 12".
